Table of Contents

Minecraft plans:	1
Introduction:	4
Scale:	5
Minecraft Scale:	5
Cost:.....	6
Total Cost:	6
Loan:	7

Introduction:

You will choose a building to reconstruct in Minecraft. You will develop a scale to use, draw diagrams of each floor & room for both the actual place and Minecraft Place. After you are done that, you will calculate Surface Area & Volume for each room. Then, you will calculate a cost, and loan payment strategy and calculating how long it will take you to repay it. Then you will develop a presentation to go with it (Names go where who did what, ex. Bob did Room 1)

Scale:

This is where you will develop your scale.

Minecraft Scale:

Cost:

This section will be about cost:

Using all of the room documents calculate total cost.

Total Cost:

Loan:

This section will be about the loan and payment of your building. Using your total cost calculate your loan and loan payment.
